This is a unique and quirky simulator game because players have to transform into a crazy goat that is released into the open world and do whatever they want to do. However, because of the singularity and the ability to release extreme stress, the game attracts the attention of many gamers. If you talk about the weird game genre, maybe not to mention the Goat Simulator of Swedish developer Coffee Stain. The game's father also described Goat Simulator as "a pretty stupid game, everything inside doesn't follow any order". But that stupidness brought Coffee Stain a small amount of money. Goat Simulator is an open world, where players can freely do everything they want without having to follow any rules or regulations. In the game, gamers will transform into a mad goat stomping into the city. Your task is almost nothing but destroying, ramming things up and making the city chaotic.
